

PRESS RELEASE – FOR IMMEDIATE RELEASE

Everest signs cloud ERP deal with HighCloud Solutions

Manchester, UK. Monday 10th April 2017.

HighCloud Solutions, a NetSuite Solution Provider that delivers NetSuite’s cloud offering to a range of sectors, including home improvements, manufacturing, distribution, and creative and professional services, has announced today that it has been selected to implement NetSuite’s cloud ERP software for Everest Home Improvements.

Everest, the UK’s most famous and respected double glazing company, has chosen to partner with HighCloud Solutions to upgrade its business systems with NetSuite’s cloud ERP solution. The first phase of the project, taking place with immediate effect, will see Everest roll out NetSuite’s financial modules to provide an integrated solution that will improve analytical capability and reporting to better control the business.

The new fully integrated NetSuite solution will provide one single, unified platform with simplified financial consolidation, real-time reporting, and greater control over project performance. With financial management and project accounting, Everest will be able to analyse and report on the business in far greater detail, enabling it to drive the business to the next level.

The second phase of the implementation, scheduled to take place later this year, will see Everest add further functionality for manufacturing, field service and potentially human capital management (HCM) to its NetSuite system, resulting in a completely integrated platform across the entire organisation.

Tony Parsell, CFO at Everest, comments: “We are delighted to be partnering with HighCloud Solutions for our NetSuite implementation – based on their experience, we know that they are the right solution provider for us. Everest is synonymous with being ‘The Best’ and we pride ourselves on achieving this across every aspect of our business. NetSuite’s modern solution will provide us with the best system to control and report on performance and to have total visibility of all our business functions.”

Steve Driscoll, CEO at HighCloud Solutions, adds: “We are thrilled that Everest has selected us as its NetSuite provider. We are excited to provide them with a ‘true cloud’ solution that will give them real-time business management and support the success of their projects.”

HighCloud Solutions was established as a specialist division of the m-hance group in 2015. The company has over 20 years' experience in implementing ERP solutions across the UK and the Republic of Ireland.

###

About HighCloud Solutions
